		users must scan in when visiting the site.				

It is important you discuss your assessment and proposed action with employees and their representatives. A risk assessment is only effective if you and your employees act on it. You must follow through with any actions required and review it on a regular basis. You should review your risk assessment if you think it may no longer be valid e.g. following an accident/incident, or if there are significant changes to the hazards in your workplace, such as new equipment or work activities. You should consider, at a minimum, an annual review of your assessment. Risk assessment guidance is available for further information and advice on carrying out a risk assessment.
